FOR IMMEDIATE RELEASE

THE TRAIL PUTS AN INHERITANCE QUEST TO THE TEST ON THE WYOMING FRONTIER

Charles David Tebbs' historical fiction novel brings a young war veteran and three companions together through danger, loyalty and a westward journey.

NEW YORK, NY, October 15, 2026 — An inheritance awaits 18-year-old James Jack in the Wyoming Territory, but reaching it demands more than a claim to a family legacy. In The Trail, Charles David Tebbs follows a young man whose background combines a pirate father with experience in the Mexican-American War. His westward undertaking places a personal ambition against the hazards of the American frontier, where survival depends on the people traveling beside him.

James begins the journey with Mo, a formidable warrior whose mysterious past adds another dimension to their partnership. Their path crosses those of Rose and Mabel, two women whose strength and resilience become invaluable to the group. Rather than leaving James to confront the trail alone, the story brings together four travelers whose courage and resourcefulness are tested by the country they must cross.

Outlaws, hostile Native American tribes and the forces of nature threaten their progress. The dangers make the journey more than a straightforward passage toward an inheritance: tragedy and triumph accompany the travelers as they press westward. Shared experience gradually binds them into a family, giving their effort to stake a claim in the West a collective significance beyond the goal that first set James in motion.

Partnership is a central interest Tebbs identifies for the book, and the novel gives that subject a concrete frontier context. Loyalty matters alongside individual courage, while Rose and Mabel's contributions make resilience a shared resource rather than the preserve of a single hero. For readers interested in relationships forged under pressure, the group's growing bond offers a point of engagement distinct from the question of whether James will reach his destination.

The Trail also brings together several specific elements for readers of historical adventure: a territorial setting, a protagonist with wartime experience, a pirate's legacy and a companion with an unexplained past. James' age stands in contrast to the experiences he already carries. That combination places youth and an eventful personal history at the center of the novel, while the frontier supplies threats from both human adversaries and the natural world.

Tebbs' interest in researching early nineteenth-century America helped provide a direction for his fiction project. He describes an approach that brings American history together with invention, and his plans extend to a three-book sequence. Within The Trail, the historical setting supports a story concerned with both claiming an inheritance and forming a family through shared experience. Its focus on interdependence gives the westward adventure a relationship-centered dimension alongside its physical dangers.

Charles David Tebbs is retired and turned to writing while seeking projects to pursue. His interests include early American history and further fictional adventures in that setting.
